## Gift Tag Instructions:

Print this page on good quality paper. Cardstock or parchment are ideal for this project. Cut around the outer heavy black line. Cut out the 2" circle. Make sure the design you will be using for the gift tag fits in the open circle. Fold the card in half with the open circle on the front. Make a crease on the fold. Open the card and place it on a flat surface. Apply a small amount of YES GLUE\* around the circle on the back side of the card. Center the open circle over your stitched design. Press lightly to adhere card to your stitched design. Open card and apply enough glue to the back of it to seal the card when it is folded. Fold card shut, being careful to line up all the edges. After glue has dried, punch a hole on the tiny circle above your design. Add ribbon and your gift tag is ready to use!

\*YES GLUE is available through SheriO Productions <http://www.sherio.com/order.htm>
